HybridChat — Real-Time Chat App

2026

[Vue.js](#) · [Tailwind CSS](#) · [Firebase Firestore](#) · [Firebase Auth](#) · [Vite](#)

Live: hybridchat.vercel.app · github.com/Meet-hybrid/hybridChat

- Built a full SPA with Vue.js (Composition API) and Firebase Firestore for real-time message sync; implemented Firebase Auth with protected routes and Firestore security rules.
- Architected modular components — ChatWindow, FloatingChat, StatusStories, AdminView — with Pinia store for reactive state; deployed on Vercel with SPA routing config, achieving sub-2s load.
- Handled real-time edge cases: message ordering, offline state, and concurrent sessions using Firestore listeners and Vue watchers.

- Built interactive dashboard consuming a Python REST API; used Redux slices for agent KPIs, sales metrics, and filter state with error boundary and loading state handling.
- Designed reusable chart and data-table components with responsive layouts; applied graceful degradation on API failures.
